VEPCO Increases Dividend to Stockholders

Virginia Electric and Power Company today declared regular quarterly dividends on its preferred and preference stock and a quarterly dividend on its common stock of 35 cents per share, an increase of 2 cents per share from the dividend paid in the previous quarter.

"The increase in common dividend marks the third increase since 1973. We hope that this 6 percent increase in the common stock dividend will be well received by our common stockholders and will make our common stock more attractive to investors who must provide a significant portion of the funds required to meet the needs of our customers. This is the second consecutive yearly dividend declared by our Boards of Directors. Unfortunately it does not keep pace with the inflation rate since the last dividend increase," stated T. Justin Moore, Jr., Chairman of the Board of Vepco.

Dividends of preferred, preference, and common shares are payable June 20, 1979 to holders of record on May 31, 1979.

There is nothing quite as satisfying as a good "standing" crop.

But a destructive hailstorm can ruin that crop in seconds. High winds can severely damage a dwelling, barn, or other building. Lightning loss is a big concern at this time of year.
